Engineering Bootcamp
Remote | 03/2023

TECHNICAL SKILLS

JavaScript · Python · GitHub · Gitlab · Microservices · Front-End Development · Docker · React.js · React Hooks · Django · HTML5 · CSS · SQL · DOM manipulation · RabbitMQ · FastAPI · Redux Toolkit · Domain Driven Design

APPLICATION DEVELOPMENT EXPERIENCE

TherapyHub 2023: *Full-stack application using FastAPI, React, Python & Docker*

- Developed a FastAPI directory web application with user authentication, responsive design, form handling, search functionality and database integration.
- A web application to increase access to mental healthcare by allowing therapists to create profiles, display their information, allow users to search and filter therapists by location, specialties and payment options.

Scrumptious 2022: *Full-stack application using Python, HTML, CSS and Django*

- Developed a functioning Django based recipe web application with user authentication, database integration, responsive design and form handling.
- Designed web application utilizing HTML and CSS.

Conference Go 2023: *Full-stack application using Python, Django, Docker, API's, React and Microservices*

- Developed a functioning Django based project to collect conference data, user information, user creation, user deletion and user updates.
- Utilized multiple microservices to create events, sign up for events and sign up to present at the events.

CarCar 2023: *Full-stack application using Python, Django, Docker, API's, React and Microservices*

- Developed a functioning Django based project to provide an auto dealership with vehicle data, sales, service appointments and tracking history of sales/service appointments.
- Utilized multiple microservices to input vehicle information, create sales information/history and service information/history.

PROFESSIONAL EXPERIENCE

Licensed Marriage and Family Therapist #124629

Penny Lane Centers, North Hills, Ca
Intake Therapist/MAT Assessor

May 2021-Sep 2022

- Conducted suicide risk screenings and client treatment plans to assess the needs of clients, gather client's psychosocial history, formulate a psychosocial diagnosis, and determine the most appropriate method of providing services.
- Conducted DCFS MAT assessments for children recently removed from their homes due to abuse allegations to identify current needs when entering the foster care system.

Outpatient Therapist

Feb 2019-May 2021

- Utilized evidence-based practices to provide services to clients ages 4-18 and families while following DMH documentation standards as well as providing group therapy for ages 6-18 years old.
- Addressed client's treatment through a team approach by collaborating with treatment team members such as case managers, psychologists, and psychiatrists.
- Developed strategies to utilize mobile apps and video games to engage and provide treatment in telehealth sessions during the COVID-19 pandemic.
- Collaborated with the Clinical Director to explore and implement strategies to reduce staff burnout.
